Hi Normandie Jury

I use an electronic "voice amplifier" due to an injury on my voice. It only helps me make my voice a bit higher: it does not give me any advantage. Without it I unfortunately Can not communicate with my Crew in wind. It is just a mic connected to a small speaker that I wear. It Can not recieve any signal.

I just want to make sure that it is okay that I use it?

I Got permission at The former WWMRT tour events.
